System Architecture Diagram

View: (GatsbyJS)

- Responsible for presenting the users with the pages that they can interact with

Front-end Controllers: (Redux and Axios)

- Responsible for linking the front-end and back-end with transferring and retrieving information between the front-end to the back end

Back-end Controllers: (ExpressJS, PassportJS)

- Responsible for receiving, processing, handling and implementing the requests

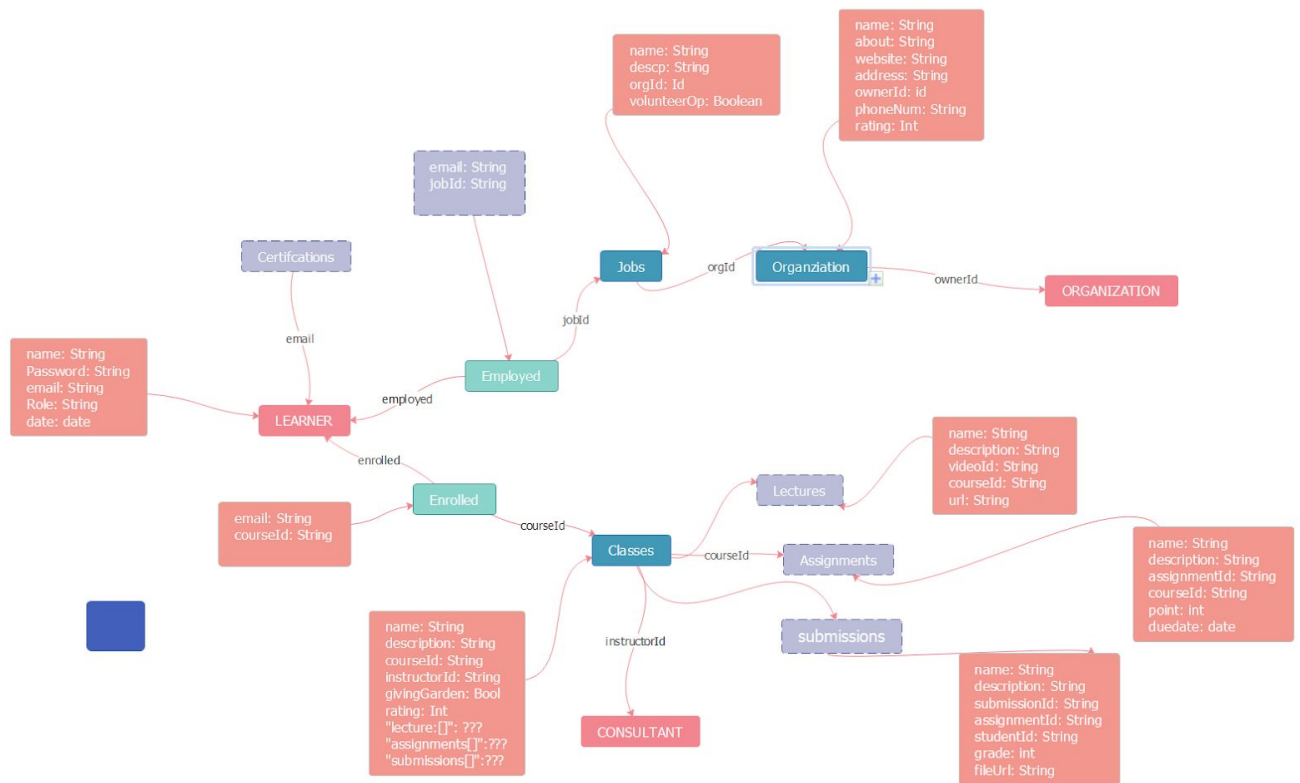

Model: (ExpressJS, MongoDB)

- Responsible for managing and manipulating the database (MongoDB)

Error handling is done throughout the components, mainly within the back-end controllers (ExpressJS and PassportJS) and Model (verify data using the database). For more info:
